

Land Surveyor and  
Digital Twin Creator in  
Johnson County, TX

## *Professionalism, Precision, & Innovation*

### Who We Are

30+ years of surveying experience across Texas, including the Gulf Coast, West, North, and Central Texas. Expertise in land development, oil and gas engineering support, and specialized surveying, using cutting-edge technology for precise, high-quality results.

### Mission

Our mission is to maintain our status as the go to surveying and mapping firm in Johnson County. We want to be leaders in both innovating new methods, as well as sharpening the methods used today.

# Technological Innovation

We utilize industry-leading equipment to efficiently capture high-density data, offering deliverables in various formats to meet your needs. All data processing and analysis are done in-house, ensuring top-notch quality precision.

3D LASER

## Leica RTC360 3D

High-quality scans are created quickly with high measuring rates and advanced HDR imaging

AUTO LEVEL

## Leica LS15

The industry leader in automatic digital leveling providing reliable results with 0.2mm accuracy

LIDAR

## MiniRANGER-3 Lite

Acquires survey-grade LiDAR data and high resolution at up to 100m operating flight altitude

DRONE

## Carrier H6 Electric

Harris Aerial H6E's flight duration makes it perfect for large area mapping

## Top Rated Google Reviews

**Rebecca Stroud**

5 ★

I hired them to survey a property. The price was fair, and the job was done quickly. I would definitely use them again.

**Rich Sikes**

5 ★

Trans Texas is our go to for all of our surveying and re-platting needs.

**Laura Korderas**

5 ★

Great company and great people to work with! Reasonable prices, highly recommend!!
